MARKET REPORT.

Messrs, James F. Hutton and 1.td., Manchester, in their Weekly Mar. ket Report, dated March 26, state :--Corton prices are still advancing slightly and the tone of the market is inuch firmer. . Up the this week . the stronger feeling in cotton had not been reflected in the prices for yarus and chall but there is now an appreciable advance being obtained for the manuincrured article and most of the business done during the past few days has been on a higher basis to that which obtained neweek ago.

The final ginning figures for the season, were issued last week end by the United States Government but did not produce much excitement. They caused a little hardening at New York but were generally about what was expected. The total was 14,593,000 bales (including 029,010 linters) against last year's - 44,091,000 (602,324 linter-) and the year before 16,100,000 bales (556,276 linters). Linter being cotton which it is impossible to spin and is used for other purposes so that they would probably be hetter left out of calculations altogether. Some confusion has arisen through the separation this year in the statistics of the linters from the bulk, but it may be taken roughly that we are half a million

bales ahead of last year's crop. Reports of the market vary very much but it is certain that there is much more husiness doing than for some time past, although there is of course much grumbling with regard to prices taken. There are still weak places to be found in the ranks of manufacturors and until these get filled up it will be still possible to buy cloth cheaply. We do not wish to give the impression that there is a strong general demand as this is, not so but there is an improvement on the extreme stackness which has reigned up to a month ago from practically last Septemher. Most of the enquiry scenes to be teem India and is well spread over the dependency, .. Calcutta, Madras Bombay, Karnchi and Cawapore all dealing in moderate quantities when sellers are not ton rigid in price. Dhooties have come in for special attention and accordingly primes for these goods are hardening.

China has not been doing much and the position out there has become rather depressed. Deliveries from stock have been falling off and nuctions are reducing their sales, in addition to which auction prices are also dropping. There seems to be further unreat setting in which is helped by disturbing rumours of more trouble.

The improvement of things here seemed to have put a stop to further short time being adopted in the weaving centhree but there is this week a proposal to stop all spindles for a week at Easter and a ballot will be taken by the spinnews federation on the question. If this is done it will no doubt strengthen spinners position somewhat.

A disestrous fire occurred at Mandalay at 2 a.m. on March 26th which at one time threatened to imperil the civil hospitals and civil line". Nearly one hundred houses were burnt down. Most of them were occupied by well-to-de Burmans, 1,500 of whom are homeless. One girl is thought to have perished in the flames, which appead with amazing rapidity. A distress committee was appointed and food was distributed to the destitute people. The damage is estimated at Re. 70,000.

#### SCRAMBLE POR CHINESE CONCESSIONS.

The Peking correspondent of " Times 's says that Sino-Japanese Corporation, formed last year, by Sun Yatsen ostensibly with equal Chinese and Japaneso interests, but in which, it is safe to assume, Japanese empital will predominate, has definitely entered the field of industrial enterprise in China. There is every prespect that the activity of the Corporation will equal that of the Banque Industrielle and that its success will be even greater.

Meanwhile aBritish enterprise lan guishes for lack of the organisation and the financial arrangements essential to success. Opportunities for profitable development are infinite in China, but the Chinese are almost entirely incapable of taking advantage of them, partly through ignorance and incapacity, partly | LONDON: through lack of capital. Jealously of the intrusion of foreign capital, the employment of which remains under foreign control, is as great as ever, but is breaking down before the inducements which have recently become fashionable. For almost nominal amounts of bargain money the Chineso are now giving valuable contracts and concessions to anyone who seeks them and undertakes to provide funds necessary for the pur-

chase of material or for development. It has to be recognised that an era of scramble has set in in China, and those who scramble intelligently will now obtain opportunities likely to be extraordinarily profitable in the future. The hazy political prospects of the country and the desperate financial position of the Government hardly affect the value of these opportunities, for, whatever the fute of China, the foreign Governments concerned will always be both able and ready to protect the investments of their nationals.

THE TANGTHEE SPHERE. The intimation to China that the British Government expects its predominant interests in the Yangtszer Valley to ba' recognised is satisfactory as indicating a much-needed stiffening of British policy. It is a regrettable fact that our policy in late years has been unfavourable to the development of British is terests; and that the predominance we claim in the Yangtezo has been seriously diminished. If our position is to be reestablished it must be through private enterprise, for claims of predominance countryman and when the authorities by the British Government are meaningentered his cell he was found lying dead, less unless made good by the activity of our commerce and industry.

All possible diplomatic countenance and apport are now guaranteed in Peking to responsible British firms pursuing legitimate business. Moreover the Chineso express their readiness favourably to consider any industrial proposals emanating from British sources: It is, however, a lamentable fact that the financial arrangements of British fit as represented in China compare so unterourably with those of foreign organisations in the field that their prospects of success are strictly limited.

Association is making its influence felt in the direction of safeguarding if not also extending our industrial interests in China. At the annual dinner of the Association, on Friday last, it was announced that the membership had increased during the year from 03 to 204, and that the capital involved in the businesses of the members was now 80 millions, as compared with 39 million sterling a year ago. The aims of the Association were most aptly described by Dr. Chin-Tao Chen, the Chinese Commissioner of Finance, as "to protect British manufacturers and Chinese consumers, to jurther British trade and fair dealing by enlightening and educating the Chinese people to appreciate the quality and value of British goods, and, most important of all, to cultivate the friendly relations and goodwill of the two nations." These are most commendable objects. and their realisation is being carried out under the presidency of Mr. Douglas Vickers with a "due regard | juges 3 and 4. to the high ideals which have so long ALGAR. -- On April 13, at 71 Avenue characterised the relation of British manufacturers with foreign clients. The scheme of the British Engincers' Association, to judge by recent criticisms, seems to be misunderstood in some quarters. In some journals there have been letters based on this misunderstanding, and because o this we have refrained from publishing similar communications. The British Engineers' Association is not directly a combination designed primarily to secure orders for individual members. Indeed, as Mr-Vickers clearly pointed out at the dinner, it was conceïvable that equal proportions of orders might not directly accrue to all members of the Association, because the aim was rather to permit of closer association between the Repu'lic of East and Britain as nations, regard being had not alone to trade, but to the many incidental relationships which themselves indirectly foster trude. The Association have consequently confined themselves for the present to P60,000. sending out to China a chief commissioner, un assistant, and an engineer, whose metion, collectively, is to keep the Association and the indivied of all that is passing in China particularly in respect of contracts, and of openings and possibilities for new trade. There has just been prepared a subject-matter index, which are classified the production of all the members, and it is the business of the Chief Commissioner to see that such book is available for merchants in China. Admittance to the Association, too, is scrupulously guarded so that membership may be accepted by possible clients in China as guarantee that the work entrusted to them will be done with the most satisfactory results. Again, the bond between the two countries is being immensely strengthened by the equipment of the engineering department Engineering manufacturers through- of the University of Hong Kong out the world continue to look with entirely by British appliances, and eager intent upon the approaching members of the Association have development in China and the con- spent on these £10,000 during the sequent potentialities for extensive past year. ## MORE ABOUT ULSTER.

THE UNIONISTS' YERSION OF AN OLD STORY.

London, April 18.

A committee of the Ulster Unionist Council, with the approval of Sir Edward Carson, bus issued a statement declaring that General Paget was acting on the instructions of Colonel Seely when he informed Generals in the Irish command that the Government had decided to undertake active operations against Ulster. The statement further clares that Colonel Seely issued a detailed plan of operations under which the 3rd Cavalry Brigade was to seize strategic points along the Boyne, a force of 10,000 men was to move from Lichfield and Aldershot making 25,000 troops engaged. The statement also, alleges that General Paget explained that the object of the operations was to blockade Ulster by land and sea, and that it was not intended that the Army should begin Sir H. C. Belfield, C.M.G., has the fighting, but that the troops aided by Naval detachments, should be held in readiness to support the prolice in searching Unionist depots.

# UNIQUE MARRIAGE SERVICE

The Law of Monogamy.

The form of service us d'on the oc-Douglass Rodger to Miss Beatrice Marjorie Power, at the I ited States Consolate-General, Shanghai, on April 4, was unique and has aroused considerable comment and curiomty. The service which Dr. J. G. Redger, the father of the bridearnom, used was that which officers of the International University Union are author-

ized to use, and the text is as follows:--"Friends we have met here in order to give this youth and uniden an opportunity to publicly declare heir voluntary mutual choice each of the other, as a companion

"This is in accordance with a great law written on all earth ble. We find it first plant life, more clearly is it' expressed in animal life. When we come to the human and the youth says. I would anoner have this maiden as my companion for life than pass through life slone; yes, would sooner have this maiden as my companion for my life than any other nmiden I know'd and the maiden answers would sooner have this youth, as my companion for; life than live my life alone, yes I would soomer have this youth as my companion for life than any other youth know: the law of monogamy is most clearly expressed as the highest law of the highest earth life, the human.

"Even in countries where polygamy is practised there is the most beloved wife in every harem. The Taj Mahal of India is but one of many witnesses to this fact. In countries where poly-ndria is practised there is also the most beloved of the many husbands. So these seeming exc ptions but prove the great law of monogamy as the law according to which the highest forces of earth life, the human, operate. We ask you then to listen to the declara-

But he returns to China every bit as much are individualist as when he left it. The chances are indeed, that his individualism is ever more pronounced; for while on the one hand he has been living as a stranger amongst strangers, he returns with-a number of ideas which do not fit into his, matica surroundings. He has been at a British University, perhaps, but he has not been of that University. He has been a member of a college, but he list not shared its life in any thorough, whole-hearted way. At Hongkong Univarsity he can do this. He can learn what it is to be one of a closely united society, and, at the end of his time be can return to his home, as the Chineso calucated abroad does not return, a graduate not only in western knowledge but in the essentials of the Western spirit That is one of the main aims which the University of Hongkong keeps steadily

A noticeable and new feature of the tournament is that the games are not conducted with the decorum that has obtained in the past. Some of the spectators are inclined to be noisy and the players at the next table indulge in horseplay that cannot fail to affect the players engaged in the tournament. Ferhaps it has only to be mentioned to be remedied.

Why Endure Pimples and Blackheads?

If you wish a skin clear of pimples, blackheads and other annoying eruptions, begin today the regular use of Cuticura Soap assisted by Cuticura Ointment. No other method is so agreeable, or so often effective.

TREATMENT: - Gently smear the affected parts with Cuticura Ointment, on the end of the finger, but do not rub. Wash off the Cuticura Ointment in five minutes with Cuticura Soap and hot water and continue bathing for some minutes. This treatment is best on rising and retiring. At other times use Cuticura Soap freely for the toilet and bath, assisted by occasional applications of Cuticura Ointment to prevent inflammation, irritation and clogging of the pores, the common cause of these distressing facial eruptions.

Curiours Soap and Ointment mid everywhere. Hattiple of each with 32-p. book, free from nearest denot:
